Reality 101
Purpose:
Hands-on economics learning for 8th & 9th grade students. This is an interactive lesson about what life as adult is really like.

Overview of Program:
The students, posing as adults age 28-30, are given “real” jobs, salaries, families and true-to-life challenges and successes. They then enter the Reality Store to purchase required goods and services such as childcare, groceries, utility services and the like, all affecting balance of their checking account and illustrating the importance of a wise career choice.

Manufacturing Day
Purpose:
Expose students to exciting and financially rewarding manufacturing career options available to them in our city.

Overview of Program:
Students tour three businesses, observing every career option available with the employer. They compete in trivia and challenge activities that help them learn what the company manufactures, discover what interests them, and learn what the work environment really looks like.

Education in Industry
Purpose:
Educators get the opportunity to see first-hand the careers available in our local industries as well as learn from the industry management team as to the skills/experience needed to obtain these high-demand positions.

Overview of Program:
Educators spend a day within local industries and are given interactive opportunities to see and experience how certain skills and knowledge acquired in High School are then applied in the workplace.

Job Shadowing
Purpose:
Expose students to exciting and financially rewarding career options they may not have thought about which are available to them in our city.

Overview of Program:
For nine weeks students spend an hour observing different careers. They choose their career focus and are able to observe that job in action as well as others similar to it. The outcome is that students realize their true career interest before they invest in a college education.

Vehicle Day
Purpose:
An opportunity for 1st grade students to learn about vehicles that make businesses work.

Overview of Program:
Vehicles from local businesses are parked in a large parking lot for the day. Students are bussed to the parking lot and spend the day visiting each vehicle, hearing from the business representatives about how those vehicles are used at work, and asking any questions about their business.

Industry in Education
Purpose:
Business representatives provide education about the importance of soft skills and personal presentation through the job interview process and beyond.

Overview of Program:
Local hiring professionals take part in classroom presentations teaching students how to write a business resume and they provide examples of soft skills required for success in the workplace. High School juniors and seniors are then required to take part in mock job interviews with industry professionals.

Columbus Dream Team
Purpose:
The Dream Team is made up of young professionals who reach out to students to highlight their talents and spotlight the rewarding career opportunities within advanced manufacturing.

Overview of Program:
The Dream Team members share their personal journey in advanced manufacturing and related fields through classroom presentations, promotion through the media, and within the Dream It! Do It!’s campaigns.

Future Problem Solvers
Purpose:
Hands-on critical thinking, project-based learning and place awareness for high school students. It is an interactive lesson on real-life problems faced by area businesses.

Overview of Program:
The students hear from company leadership about their unsolvable problems. They tour the facility to witness the problem first-hand. The students brainstorm possible solutions for the issue, then present their solution to the company leadership, practicing their public speaking skills and allowing them to build a relationship with the employer.

College Week
Purpose:
This pro-college week is for 4th & 5th grade students, and is focused on teaching the importance of thinking ahead at an early age about all of the possibilities in their future regarding a post-secondary education.

Overview of Program:
Students tour a college campus, explore career options, meet professionals in the field, and discover various post-secondary options to get them to where they want to be. Students then set SMART college goals for own their future.
